SPECIAL SAFEGUARDS FOR FACILITIES OR ACTIVITIES

Security of and Access to Campus Facilities

All University students, faculty, and staff are issued a University ACCESS card (physical or virtual) for the purpose of photo identification as a Santa Clara University student, faculty, or staff member. The ACCESS card is also used to gain entry on an authorized basis to University facilities. Mobile credentials (virtual) are also available for staff and faculty using an iPhone, Apple Watch or Android phone.

Individuals who live in University housing have secured access to the residence halls or neighborhood units and their rooms through their ACCESS cards or mobile credentials.

The appropriate campus official must clear public and commercial access to any campus location in advance. The general public may attend events at specified locations on campus.

Campus Safety Services officers regularly patrol the campus and many University-owned properties that are considered off-campus. Many areas of the campus are monitored by video surveillance cameras, operated by Campus Safety Services.

Security Considerations Used in the Maintenance of Campus Facilities

Regular inspections and surveys of campus indoor/outdoor lighting, shrubbery and walkways are conducted. Safety surveys are conducted during routine patrols by Campus Safety Services Staff so that improvements or repairs can be made to various locations on campus. All emergency blue phones are checked weekly by Campus Safety Services Staff and repairs are conducted as needed.

Emergency Training and Exercises

Campus Safety Services has partnered with the Santa Clara Police Department to offer ongoing Active Treat Presentations to the campus community.

Annually the University's Emergency Operation Center and Bronco Response Team members take part in a large-scale tabletop exercise.

Building Evacuation drills are conducted in partnership with Residence Life, twice per academic year.

Presentations to New Students & Parents:

On an annual basis, representatives from Campus Safety Services speak to new students and parents at welcome weekend orientations. Topics include crime prevention, personal safety tips and descriptions of the services and programs provided by Campus Safety Services. This report is a separate and distinct report from the Annual Security and Fire Safety Reports (ASR) for the Santa Clara University Main Campus and Jesuit School of Theology that are required under the Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act (Clery Act).

This report's statistics were compiled using the FBI Uniform Crime Reporting definitions. These statistics are crimes that have occurred on campus. This report is in compliance with California State Education Code, Ch 16, of the Donahoe Higher Education Act, Section 67380.

Incidents in the tables below were determined to meet the definition of “hate crime” as defined by CA Penal Code 422.55 or “hate violence” as defined by CA Education Code 67380.

The State of California has not defined “Non-criminal Hate Violence”. The definition of non-criminal hate violence for purposes of this report includes non-criminal conduct that is motivated by hatred or bigotry and directed at any individual, residence, house of worship, institution, or business expressly because of the victim's real or perceived race, nationality, religion, sexual orientation, gender, or disability. Hate incidents also include conduct directed against an individual or group because of their association or advocacy on behalf of a member or members of a protected class.

A hate incident might include hate speech, display of offensive materials on one's property, the distribution of hate materials in public places and the posting of hate materials that do not result in property damage. The freedoms guaranteed by the U.S. constitution, such as the freedom of speech, permit hateful rhetoric as long as it does not interfere with the civil rights of others.

The Education Code requires that a description be included for the category of bias as well as victim and suspect characteristics, if known. Recognizing that there is a broad spectrum of gender identities and other elements of identity, attributed victim and offender characteristics are based on the information provided by reporting parties. Other information may be included for a better understanding of statistics.
