WHAT'S THE ISSUE?

- There's currently no composting system in the villas
- Full kitchens being used multiple times a day
- Compost dumpster already in place

METHODS & RESULTS

- Waste characterization
- Conducted a survey
- Contacted Tufts
- Researched bin options

	Volume	Weight
RECYCLE	5.614583	56.9
COMPOST	3.083333	70.4
REUSE	0.03125	0.1
LANDFILL	1	9
TOTAL	9.73	136.40

CONCLUSION

- Composting is absolutely vital for the villas
- CSIF behavioral projects are capped at \$2,000
- 60 bins to pilot the composting program
- High student interest, and decent recycling habits
- Easy to use and wash bins
- We would also provide training for composting and recycling
