

PREVENT CONTAMINATION AND SPILLS

NO GLOVES on DOOR HANDLES or other COMMON TOUCH SURFACES

- DO NOT touch common surfaces with gloves ***EVEN IF*** your gloves are clean
 - ⇒ This includes all door handles, computers, phones, elevator buttons
- Open doors with a bare hand—use the “***ONE GLOVE RULE***” if necessary to protect yourself while transporting chemical and biological materials

Transport Using SECONDARY CONTAINMENT

- Transport all chemical and biological materials in corridors using secondary containment such as bottle carriers, trays or plastic totes, sealed bags, push carts, etc.
 - This includes bottles, vials, gel trays
 - Use a buddy system if necessary to open doors for you
- When using proper secondary containment, most chemical and biological materials can be safely transported ***without*** any gloves on

USE FREIGHT ELEVATOR

- DO NOT transport chemicals or biological materials on passenger elevator. Use freight elevator instead
 - Note: Access approval required
