

BIOGRAPHY

Prior to joining Santa Clara University (SCU) in 1975, Lewis worked for six years at General Electric's Aerospace Division where he designed a fault-tolerant clocking system for one of the first triple-redundant automatic landing systems for commercial aircraft. He has consulted for a number of Bay Area companies, including the Singer-Link Company, where his design of new algorithms and a corresponding modular array of VLSI circuits became the basis of a new product line of real-time computer graphics systems.

Dr. Lewis' efforts led to the creation of SCU's Computer Engineering department in 1988 and served as its department chair for the first 18 years. During his tenure, Lewis established unique co-op and study abroad options for engineering students that fit within their normal undergraduate four-year plan, certificate programs for working professionals, an interdisciplinary major in Web Design and Engineering that has attracted greater numbers of female students to computing, and an interdisciplinary minor in Information Technology and Society that became one of the most popular minors on campus.

Since 2004, Lewis has focused on K-12 outreach in engineering and computing, supporting his work by raising more than \$2.5M in funding provided by National Science Foundation (NSF) grants and private sources. Over this period, Lewis provided professional development workshops in computing for more than 250 K-12 teachers and hosted summer camps for more than 2,000 K-12 students. He currently leads an NSF-funded project to establish a new inquiry-based *Exploring Computer Science* course in San Jose area high schools that engages students through a culturally-relevant introduction to the breadth of computing.

Lewis is a founding member and steering committee member of the Alliance for California Computing Education for Students and School (ACCESS) that is working to improve California K-12 education policy for computer science. He is the 2010 recipient of SCU's Brutacao Family Foundation Award for Curriculum Innovation, and author of two books, *Fundamentals of Embedded Software: Where C and Assembly Meet*, which has been published in four languages and received national recognition in the 2003 Alpha Sigma Nu book competition, and *Fundamentals of Embedded Software with the ARM® Cortex-M3*, which has been published in two languages and cited more than 49 times according to Google Scholar.

EDUCATION

PhD, Electrical Engineering, Syracuse University, 1975. Dissertation: "Conditional Opcode Interpretation in Various Computer Architectures", Advisor: Dr. Edward P. Stabler.
Engineer's Degree, Electrical Engineering, Syracuse University, 1974.
M.S., Electrical Engineering, Syracuse University, 1972. Thesis: "Hazard Detection by a Quinary Simulation of Logic Devices with Bounded Propagation Delays", Advisor: Dr. Edward P. Stabler.
B.S., Electrical Engineering, Georgia Institute of Technology, 1968.

TRAINING

Certificate in Computer Forensics, High-Tech Crime Investigation Association (HTCIA), San Mateo, CA., May 2003.
Faculty Development Workshop V, Software Engineering Institute, Carnegie-Mellon University, Scottsdale, AZ., January 1989
Logic Symposium XI, University Associates Program, Hewlett-Packard, Colorado Springs, CO., May 1987.
(Training on the use of software for hardware simulation and development.)
Application Development Seminar for Microsoft Windows, Microsoft Corporation, Santa Clara, CA., Oct. 20-22, 1986.
Two-day short course on CMOS for faculty teaching Mead & Conway's VLSI design methodology, SynMos Corp., Dec. 21-22, 1981.
"Designing and Manufacturing Integrated Circuits – The Total Solution", sponsored by Digital Equipment Corporation, Xerox, VLSI Technology, VALID Logic Systems, Apple Computer, COMSAT, NCA Corporation, and SynMos, Sunnyvale, CA., Oct. 26, 1981.
Logic Symposium II, University Associates Program, Hewlett-Packard, Colorado Springs, CO., May 1978.
(Training on the use of hardware logic analyzers.)

ACADEMIC POSITIONS

2021-present Professor Emeritus, Computer Science and Engineering, Santa Clara University
Summer 2006 Associate Dean for Undergraduate Programs, School of Engineering, Santa Clara University
1991-2006 Chair, Computer Engineering Department, Santa Clara University
1988-1991 Associate Chair for Computer Engineering, EECS Department, Santa Clara University
1981-2021 Associate Professor of Computer Engineering, Santa Clara University
1975-1981 Assistant Professor of Computer Engineering, Santa Clara University
1974-1975 Instructor, Syracuse University
1973-1974 Teaching Assistant, Syracuse University

INDUSTRIAL EXPERIENCE

1987-96 Owner, **Key Software Products**, Menlo Park, CA.

Developed and marketed several commercial software products for personal computers.

1988-89 Consultant, **Talking Technology Inc.**, Oakland, CA.

Developed substantial portions of a touch-tone driven voice mail application.

1986-88 Engineering Consultant, **Microspec Corp.**, Fremont, CA.

Directed team of programmers to replace character-based user interface with GUI interface on control and data acquisition software for spectrometer attached to scanning electron microscope.

1985-86 Member of Technical Staff, **Singer/Link Division**, Sunnyvale, CA.

Developed new algorithms for an extensible two-dimensional systolic array of VLSI circuits for pixel processor of real-time raster-scan computer graphics system.

1982-83 Engineering Consultant, **ADAC Laboratories**, Sunnyvale, CA.

Designed 16x16 VLSI multiplier chip for window-limiting of video data at pixel rates.

1981-82 Engineering Consultant, **Bell Northern Research**, Mountain View, CA.

Provided market survey and forecasts regarding local area networks and their relation to digital PBX. Proposed modification of BNR/Northern Telecom's SL-1 PBX to allow switching voice using a static allocation of bandwidth combined with a demand-based allocation for data.

1979-80 No Fee Consultant, **XEROX Palo Alto Research Center**, Palo Alto, CA.

Studied VLSI design methodologies developed by Mead and Conway; brought the technology back to SCU by developing new course and CAD tools on VLSI design.

1977-79 Engineering Consultant, **Singer/Link Division**, Sunnyvale, CA.

Developed architecture specification for a new hidden-surface removal algorithm; provided feasibility study for real-time hardware implementation of anti-aliasing and bicubic patch algorithms.

1968-75 Development Engineer/Engineering Consultant, **General Electric Co.**, Binghamton, N.Y.

Designed micro-programmed display processor and significant portions of fail-operational hardware for triple-redundant flight control computer; supervised development of assembler, linker, and loader for same. Sole engineer responsible for hardware during three-month flight test of triple-redundant automatic landing system at the Boeing Company, Seattle.

FOUNDATION GRANTS

- NSF GK-12 Program (DGE #1045434), “A Symbiotic Exploration of Computer Science in High School Classrooms”, \$851,778, September 1, 2011.
- NSF BPC Program (CNS #1019217), “Special Project: Expanding the Impact of Computer Science in Silicon Valley High Schools and Facilitating Adoption of the ECS Curriculum Elsewhere”, \$988,593, August 1, 2010.
- NSF S-STEM program (DUE #0850097), “Attracting a New Generation of Students to Computing”, \$597,781, Jan. 2009. (Provides \$520K in scholarships to students in computing over a five year period.)

DANIEL W. LEWIS
dlewis@scu.edu

NSF ITEST program (DRL #0624479), “An Innovative Approach for Attracting Students to Computing: A Comprehensive Proposal”, \$102,209, June 2007.

NSF and Centre National de la Recherche Scientifique (CNRS). U.S.-France Exchange of Scientists to conduct research on applications of VLSI methodology to real-time raster-scan computer graphics. Universite de Rennes, France, 1980.

OTHER GRANTS AND GIFTS

Google, “Summer Institute for Humanitarian Computing” (to provide summer workshop and publications for high school juniors and seniors interested in computer science), \$5,500. Awarded April 12, 2015.

Payne Family Foundation (via Carnegie-Mellon), “2010 Alice Summer Program” (to provide professional development for 14 high school computer science teachers), \$20,000.

Payne Family Foundation (via Carnegie-Mellon) and Local Private Donations, “2009 Alice Summer Program” (to provide professional development for 40 high school computer science teachers), \$41,250.

Private Donations, “2006 ACM/TECS Workshop” (to provide professional development for 25 high school computer science teachers), \$5,000 in cash, \$3,000 in textbooks.

Private Donations, “2005 ACM/JETT Workshop” (to provide professional development for 25 high school computer science teachers), \$12,000 in cash, \$3,000 in textbooks.

IBM Corporation, Santa Teresa Lab, “Student Cooperative Testing Services,” \$16,568, Nov. 1993.

IBM Corporation, Santa Teresa Lab, “Curriculum Development and Student Cooperative Testing Services,” \$189,907, Mar. 1993.

U.S. West Advanced Technologies, Inc., “Development of a Software Analysis and Maintenance System Using Automatically Generated Object-Oriented Databases,” \$83,975, October 1989. (Co-PI)

U.S. West Advanced Technologies, Inc., “Developing and Prototyping Object-Oriented Database Systems for Software Maintenance”, \$45,225, May, 1989. (Co-PI)

North Atlantic Treaty Organization (NATO). Subsistence grant to attend NATO Advanced Study Institute on Design Methodologies for VLSI Circuits, July 1980, Universite Catholique de Louvain, Louvain-la-Neuve, Belgium.

Santa Clara University, President’s Fund Grant, “Investigation of a Common-Carrier Based Computer Communications Network to Provide Portable Computing Access”, \$900, 1979.

Teledyne Semiconductor Corp., Mountain View, CA., “Architectural Constraints of Analog-to-Digital Conversion”, \$22,908, January 1979. (PI)

University of Santa Clara, President’s Fund Grant, “Enhancement of Interactive Computer Systems by Distributed Intelligence”, \$2,000, September 1978.

Hewlett-Packard, Colorado Springs, CO., Logic Analyzers valued at \$10,000 February 1978.

HONORS AND AWARDS

ISQED Quality Educator Award, presented at the 4th Annual Interdisciplinary Engineering Design Education Conference (IEDEC 2014), Santa Clara, CA, March 3, 2014. The ISQED Quality Educator Award was established to honor educators who exemplify excellence in interdisciplinary engineering education.

Brutocao Family Foundation Award for Curriculum Innovation, Santa Clara University, September 2010. The award recognizes faculty who have improved the quality of education at Santa Clara University through significant innovations in pedagogy or curriculum development—particularly when those innovations affect a significant number of students—and who have exhibited general excellence in teaching.

“This year’s award recipient has exhibited curricular leadership in three major initiatives. First, he created a new interdisciplinary Bachelor’s program. This program, which reaches across disciplinary, school and college boundaries to involve Computer Engineering, Communication, and Art and Art History, is attracting a growing enrollment, including a large number of women students, who remain underrepresented in engineering fields. Second, he has developed outreach programs to K-12 students to encourage them to pursue the study of computing. His innovative summer camps have reached more than 2,000 local K-12 students. To accomplish that goal, he secured about \$700,000 in external grants, mostly from NSF. Third, he has led efforts to develop summer training programs for high-school computer science teachers, again with external funding and again extending opportunity beyond the University community in significant numbers. More than 200 local teachers have reinvigorated and updated their course offerings in computer science under our awardee’s guidance. For three years he has served as the campus coordinator for the Sally Ride Festival, attracting young women to science and engineering. His work in curriculum innovation and outreach exemplifies dedication to student learning and community service.”

Honorable Mention, 2003 Alpha Sigma Nu National Jesuit Book Awards (category: Mathematics/Computer Science), October, 2003. (There were a total 49 entries from 20 Jesuit colleges and universities. Entries were submitted to one of four categories. Six awards were made: four category winners and two honorable mentions.)

DANIEL W. LEWIS
dlewis@scu.edu

Recognition for Twenty-Five Years of Service, Santa Clara University, May 2000.
President's Faculty Recognition Award, Santa Clara University, April 20, 1998.
National Defense Education Act (NDEA) Title IV Fellowship, 1972-73.

PROFESSIONAL AND COMMUNITY SERVICE

Steering Committee Member, Alliance for California Computing Education for Students and Schools (ACCESS), February 2010-2018.
Member, Career Technical Education Advisory Committee, San Jose Unified School District, 2011-12.
National Science Foundation S-STEM Review Panel, September, 2011.
National Science Foundation CE-21 Review Panel, July, 2011.
National Science Foundation S-STEM Review Panel, November, 2009.
Pacesetter Member, National Center for Women & Information Technology (NCWIT), 2009-present
Foreign Students Workgroup (Administrators), U.S. Commission on Immigration Reform, San Francisco, CA., Nov. 16, 1995.
Member, Software Industry Coalition, Joint Venture Silicon Valley, 1992-94.
Conference Chair, ACM SIGSMALL Conference, Colorado Springs, CO, Aug. 2-4, 1982.
Member, IEEE/CS Standards Subcommittee on Interface Terminology, 1982.
Program Chair, ACM SIGSMALL Conference, Orlando, FL, 1981.
Guest Editor, Special Issue of SIGMINI, Vol. 6, No. 2, June-August 1980.
Vice Chairman, ACM SIGSMALL, 1981.
Board of Directors, ACM SIGSMALL, 1980-82.
University Liason, National Science Foundation (NSF) CSNET project, 1981.

SANTA CLARA UNIVERSITY SERVICE

Member, Coding Working Group, 2018-present
Member, Brutacao Awards Committee for Teaching Excellence and Curriculum Innovation, 2012-2014
Member, University Core Curriculum Committee on Pathways, 2011-14.
Chair, University Academic Affairs Committee, 2008-11.
Member, University Assessment Committee, 2009-11.
Chair, Outcomes Assessment Committee, School of Engineering, 2009-11.
Member, Grievance Committee, School of Engineering, 2009-10.
Member, Faculty Search Committee, Department of Computer Engineering, 2009-10.
Vice-Chair, University Academic Affairs Committee, 2007-08.
University Task Force on Course Evaluation, 2007-08
Coordinator, ABET preparations for the School of Engineering, 2008-10.
Chair, School of Engineering Rank and Tenure Committee, 2006-07
Member, University Ad Hoc Committee on Lecturers, 2006-07
Faculty Salary Committee, 2003-2005.
Chair, University Academic Affairs Committee, 1998-2001.
Ad Hoc Committee to form Interdisciplinary Minor in Information Technology and Society, 1998-99.
Academic Computing and Technology Committee, 1993-97.
University Honors Council, 1990-92.
University Valedictorian Committee, 1989.
Search Committee for Dean, School of Engineering, 1988-89.
University Faculty Affairs Board, 1987-90.
University Teaching and Learning Committee, 1986-88.
University Task Force on Office Automation, 1982-83.
University Financial Planning Committee, 1981-82.
University Valedictorian Committee, 1981-82.
University Computer Committee, 1981-82.
University Word Processing Committee, 1981-82.
University Library Committee, 1979-81.
University Educational Programs Committee, 1977-79.
University Ad Hoc Computer Committee, 1977-79.

NEWSPAPER ARTICLES AND OP EDs

“Coding Classes: Students, Dogged Teachers Overcome Obstacles to Add Computer Science Classes”, San Jose Mercury News, July 22, 2014. http://www.mercurynews.com/News/ci_26192415/Coding-classes:-Students-dogged-teachers-overcome-obstacles-to-add-computer-science-classes

K-12 OUTREACH ACTIVITIES

Summer Institute for Humanitarian Computing, Frugal Innovation Hub, Santa Clara University, July 11 – August 5, 2016. Funded by a grant from Google Education, this month-long workshop provided a research experience for ten high school students who developed cell phone apps for underserved populations, and helped them write conference papers and posters that were submitted to ACM DEV 2016. Two of the three papers submitted were accepted for publication.

NSF Graduate Fellow Training Workshop on Exploring Computer Science (ECS) Curriculum (September 2011 and summers 2012 and 2013): Organized and ran a workshop for graduate students who will support San Jose area high school teachers in their classrooms.

NSF Reflection Workshops on Exploring Computer Science (ECS) Curriculum (Summer 2011 and 2012) A two-day meeting with high school teachers who taught the ECS curriculum the preceding year to review and discuss their experience.

NSF Professional Development Workshops on Exploring Computer Science (ECS) Curriculum (Summer 2010, 2011, 2012, 2013 and 2014) Organized and ran workshops for high school computer science teachers on the ECS curriculum. The workshops were endorsed as part of the Teacher Enrichment in Computer Science (TECS) program of the ACM.

Alice Summer Program (Summer 2010): Raised \$20,000 to organize and offer a one-week educators' workshop attended by 14 high school teachers.

Alice Summer Program (Summer 2009): Raised \$43,000 to organize and offer two one-week educators' workshops attended by 40 high school teachers, two one-week summer day camps attended by 89 high school students, and one two-day reflection meeting for 15 teachers who participated in the 2008 Alice Workshop and have been teaching Alice during the 2008-09 academic year.

NSF Adventures in Alice Workshop (Summer 2008): Organized and ran one of five NSF-funded collaborative sites running three-week workshops for high school and middle school teachers. The Santa Clara University site included 15 teachers who were taught Alice in the first week, developed curriculum materials in the second week, and ran five practice teaching sessions at five different locations, teaching Alice to more than 100 children. This three-year project was funded by a \$103,000 NSF grant ESI-0624479, "An innovative approach for attracting students to computing: A comprehensive proposal," and co-sponsored as an ACM Teacher Engagement for Computer Science (TECS) workshop.

Tech Academy of Silicon Valley (Summer 2007-11): Liason for the SCU School of Engineering, recruiting faculty guest speakers and lab tours, and making all local arrangements.

Sally Ride Science Festival (Spring 2007, Spring 2008, Fall 2009): Campus Coordinator, recruiting faculty presenters and student volunteers, managing local advertising and making all local arrangements for facilities, food, electrical support, security, etc.

DANIEL W. LEWIS
dlewis@scu.edu

Acting Associate Dean for Undergraduate Programs (Summer 2006): Responsible for several summer outreach programs offered by the School of Engineering, including NYLF/TECH, ACM/TECS Workshop, Summer Engineering Seminar, and the SWE Get SET Program.

ACM Teacher Engagement for Computer Science (TECS) Summer Workshop (2006): Raised \$12,000 in cash and \$3,500 in textbook donations, organized, and ran this summer workshop for 25 high school computer science teachers. The goal was to help high school teachers create a variety of “magnet” courses that will increase high school student interest in computing. The workshop included one day each on Alice, Media Computation, and Using XML and Javascript to create custom skins for the Windows Media Player. Teachers attending came from all over the western United States.

ACM Java Engagement for Teacher Training (JETT) Summer Workshop (2005): Raised \$10,000 in cash and \$4,500 in textbook donations, organized, and ran this summer workshop for high school computer science teachers who teach the AP course in CS. The goal was to improve their advanced-level skills in Java programming. A total of 26 teachers came from all over the West Coast to attend this workshop.

National Youth Leadership Forum on Technology (NYLF/TECH): Member, Advisory Board (2004-2007). Organized 2004 and 2006 site visits to Santa Clara University

Member, **Parent-Teacher Advisory Committee on Technology**, The Harker School, San Jose, CA. (2003-04)

Instructor, **Lego Mindstorm Robotics Club**, Stevens Creek Elementary School, Cupertino, CA., 2005-06.
